March 31, 2017

Dear Colleague,

Last month, we shared the announcement that AURA will transition to Fidelity as the sole service provider for AURA’s retirement plans. In addition, we highlighted that the investments offered through Fidelity as part of AURA’s core plan would be changing. The changes reflect the Committee’s ongoing review and analysis of the investment funds.

What does this change in investment options mean for you?

**Current Fidelity Participants**
Beginning July 1, 2017, current Fidelity participants will only be able to invest in the new investment options. As of that date, investments that are not in the list below will not be available as part of the core program. If you want to remain in your current investment options, you will need to establish a Fidelity BrokerageLink account. Those that do not establish a BrokerageLink account will have their funds moved (or mapped) to the new investment line up. A mapping schedule will be provided to you at a later date. However, pages 4 – 6 of this document provide a summary of the four-tiered investment line up. Pages 7 - 27 provide detailed descriptions of the new investment options.

**Current TIAA Participants**
Beginning August 1, 2017, current TIAA participants will be transitioned to Fidelity. New contributions will be directed to investment options you will be asked to select from the new investment options. Pages 4 – 6 of this document provide a summary of the four-tiered investment line up. Pages 7 -27 provide detailed descriptions of the new investment options.

**Information Sessions for All Participants**
A schedule of Open Forum and Individual Meeting dates that have been scheduled are included in pages 2 - 3. Please note that you can request a meeting with a Fidelity representative via phone if you prefer not to wait for the Individual Meeting dates scheduled for your location. Please contact your local HR representative or Elvira Nees, Retirement Plan Administrator if you are interested in such a meeting.

Sincerely,

Debbie Johnson, CFO
On behalf of the Retirement Plan Oversight Committee
Below is a schedule of Open Forum and Individual Meeting dates. We continue to work on scheduling dates and an updated schedule will be provided once all Open Forum and Individual Meeting dates have been confirmed.

Please note that dates are subject to change based on unforeseen circumstances.

Investment Lineup Beginning July 1, 2017

To simplify your choices, the Committee has created the following four-tiered investment lineup.

The new investment lineup will be available on July 1, 2017. There will be four types of investment options within the lineup so you can easily create an investment mix to help you meet your retirement goals and investing style and needs. You do not need to choose from just one category; you may invest using any or all of these categories.

Tier 1: Target Date Funds

Target date funds are mutual funds that automatically reset the asset mix of stocks, bonds, and cash equivalents in their portfolios based on an anticipated retirement date. Their returns are not guaranteed, but depend on how the market performs.

Through the AURA Retirement Plans core fund line up, you have access to the Vanguard Target Retirement Date Funds. These are designed for investors expecting to retire around the year indicated in each fund’s name. The funds are managed to gradually become more conservative over time as they approach the target date. The investment risk of each target date fund changes over time as its asset allocation changes. The funds are subject to the volatility of the financial markets, including that of equity and fixed-income investments in the U.S. and abroad, and may be subject to risks associated with investing in high-yield, small-cap, and foreign securities. Principal invested is not guaranteed at any time, including at or after the funds’ target dates.

Tier 2: Core Array

The funds in this category are comprised of index funds. Index funds seek to match their benchmark’s performance, rather than beat their benchmark. Because the objective is simply to mirror the holdings and returns of a particular index, less research is needed, transactions occur less frequently, and expenses tend to
be lower than those of actively managed funds.

Ultimately, index funds are designed to provide exposure to a broad selection of securities at a relatively low cost. While these funds typically perform very similarly to the index they track, you should be aware that index funds cannot be expected to meet or beat the index’s performance.

</tbody>
</table>

**Tier 3: Extended Array**

If you want an actively managed investment menu in funds selected by the Committee, these investment options may be the best alternative for you. The Extended Array Tier is made up of actively managed funds. An actively managed fund strives to deliver returns that have outperformed its respective market index through active management. The investments include mutual funds across several asset classes, such as domestic and international equities, fixed income (bonds), and guaranteed income investments, etc. It’s up to you to decide how much risk you want in your portfolio and how to allocate your assets among the menu of core funds. As a general rule, you should periodically evaluate and rebalance your investments and retirement portfolio based on your retirement goals, risk tolerance, and time horizon.

The cost of actively managed funds may be higher than passively managed funds.

**Tier 4: Fidelity Mutual Fund Window**
A self-directed brokerage account combines the convenience of your retirement plan with the additional flexibility of an individual brokerage account. It gives you expanded mutual fund investment choices and the opportunity to manage your retirement contributions.

A self-directed brokerage account includes investments beyond those in your plan’s lineup. The Retirement Plan Oversight Committee neither evaluates nor monitors the investments available through a self-directed brokerage account. It is your responsibility to ensure that the investments you select are suitable for your situation, including your goals, time horizon, and risk tolerance. Contact Fidelity for a fact sheet and/or commission schedule for applicable fees and risks.

For more information, please visit NetBenefits.com or call Fidelity at 800-343-0860.
Refer to this *Investment Options Guide* for fund descriptions of the new investment options that will be available in your Plan beginning July 1, 2017.

Fund descriptions are provided directly from the fund companies.

**KEY CODE**

**Ticker:** This is also called the “trading” symbol for the fund. If the fund is listed and traded on any of the major exchanges, this is the code that is used to identify the fund.

---

**Causeway International Value Fund Class Institutional**

**Ticker:** CIVIX  
**Gross expense ratio:** 0.91% as of 01/26/2017  
**Objective:** The investment seeks long-term growth of capital and income.

**Strategy:** The fund invests primarily in common stocks of companies located in developed countries outside the U.S. Normally, it invests at least 80% of its total assets in stocks of companies located in a number of foreign countries and invests the majority of its total assets in companies that pay dividends or repurchase their shares. The fund may invest up to 10% of its total assets in companies in emerging (less developed) markets.

**Risk:** Foreign securities are subject to interest-rate, currency-exchange-rate, economic, and political risks, all of which may be magnified in emerging markets. Value stocks can perform differently than other types of stocks and can continue to be undervalued by the market for long periods of time. Stock markets are volatile and can decline significantly in response to adverse issuer, political, regulatory, market, economic or other developments. Additional risk information for this product may be found in the prospectus or other product materials, if available.

**Short-term redemption fee:** This fund has a Short-term Redemption Fee of 2.00% for shares held less than 60 days.

**Who may want to invest:** Someone who is seeking to complement a portfolio of domestic investments with international investments, which can behave differently; Someone who is willing to accept the higher degree of risk associated with investing overseas.

This description is only intended to provide a brief overview of the mutual fund. Read the fund’s prospectus for more detailed information about the fund.

---

**Fidelity® 500 Index Fund - Institutional Class**

**Ticker:** FXSIX  
**Gross expense ratio:** 0.035% as of 07/01/2016
**Objective:** Seeks to provide investment results that correspond to the total return (i.e., the combination of capital changes and income) performance of common stocks publicly traded in the United States.

**Strategy:** Normally investing at least 80% of assets in common stocks included in the S&P 500 Index, which broadly represents the performance of common stocks publicly traded in the United States.

**Risk:** Stock markets, especially foreign markets, are volatile and can decline significantly in response to adverse issuer, political, regulatory, market, or economic developments.

**Short-term redemption fee:** None

**Who may want to invest:** Someone who is seeking the potential for long-term share-price appreciation and, secondarily, dividend income; Someone who is seeking both growth- and value-style investments and who is willing to accept the volatility associated with investing in the stock market.

This description is only intended to provide a brief overview of the mutual fund. Read the fund's prospectus for more detailed information about the fund.

The S&P 500 Index is a market capitalization-weighted index of 500 common stocks chosen for market size, liquidity, and industry group representation to represent U.S. equity performance.

Returns prior to May 4, 2011 are those of the Premium Class and reflect the Premium Class' expense ratio. Had the Institutional Class' expense ratio been reflected, total returns would have been higher.

---

**Fidelity® Extended Market Index Fund - Premium Class**

**Ticker:** FSEVX

**Gross expense ratio:** 0.07% as of 07/01/2016

**Objective:** Seeks to provide investment results that correspond to the total return stocks of mid- to small-capitalization United States companies.

**Strategy:** Normally investing at least 80% of assets in common stocks included in the Dow Jones U.S. Completion Total Stock Market Index, which represents the performance of stocks of mid- to small-capitalization U.S. companies.

**Risk:** Stock markets, especially foreign markets, are volatile and can decline significantly in response to adverse issuer, political, regulatory, market, or economic developments. Investments in smaller companies may involve greater risks than those in larger, more well-known companies.

**Short-term redemption fee:** None

**Who may want to invest:** Someone who is seeking the potential for long-term share-price appreciation and, secondarily, dividend income; Someone who is seeking both growth- and value-style investments and who is willing to accept the generally greater volatility of investments in smaller companies.

This description is only intended to provide a brief overview of the mutual fund. Read the fund's prospectus for more detailed information about the fund.

The Dow Jones U.S. Completion Total Stock Market Index is an unmanaged index that represents all U.S. equity issues with readily available prices, excluding components of the S&P 500.
Fidelity® International Index Fund - Premium Class

Ticker: FSIVX
Gross expense ratio: 0.08% as of 07/01/2016
Objective: Seeks to provide investment results that correspond to the total return of foreign stock markets.

Strategy: Normally investing at least 80% of assets in common stocks included in the Morgan Stanley Capital International Europe, Australasia, Far East Index, which represents the performance of foreign stock markets.

Risk: Stock markets, especially foreign markets, are volatile and can decline significantly in response to adverse issuer, political, regulatory, market, or economic developments. Foreign securities are subject to interest rate, currency exchange rate, economic, and political risks, all of which are magnified in emerging markets.

Short-term redemption fee: None

Who may want to invest: Someone who is seeking to complement a portfolio of domestic investments with international investments, which can behave differently; Someone who is willing to accept the higher degree of risk associated with investing overseas.

This description is only intended to provide a brief overview of the mutual fund. Read the fund's prospectus for more detailed information about the fund.

The MSCI Europe, Australasia and Far East Index is an unmanaged market capitalization-weighted index designed to represent the performance of developed stock markets outside the United States and Canada.

Returns prior to October 14, 2005 are those of the Investor Class and reflect the Investor Class' expense ratio. Had the Premium Class' expense ratio been reflected, total returns would have been higher.

Fidelity® U.S. Bond Index Fund - Premium Class

Ticker: FSITX
Gross expense ratio: 0.05% as of 10/29/2016
Objective: Seeks to provide investment results that correspond to the aggregate price and interest performance of the debt securities in the Bloomberg Barclays U.S. Aggregate Bond Index.

Strategy: Normally investing at least 80% of the fund's assets in bonds included in the Bloomberg Barclays U.S. Aggregate Bond Index. Using statistical sampling techniques based on duration, maturity, interest rate sensitivity, security structure, and credit quality to attempt to replicate the returns of the Index using a smaller number of securities. Engaging in transactions that have a leveraging effect on the fund, including investments in derivatives - such as swaps (interest rate, total return, and credit default) and futures contracts - and forward-settling securities, to adjust the fund's risk exposure. Investing in Fidelity's central funds (specialized investment vehicles used by Fidelity funds to invest in particular security types or
investment disciplines).

**Risk:** In general the bond market is volatile, and fixed income securities carry interest rate risk. (As interest rates rise, bond prices usually fall, and vice versa. This effect is usually more pronounced for longer-term securities.) Fixed income securities also carry inflation risk and credit and default risks for both issuers and counterparties. Unlike individual bonds, most bond funds do not have a maturity date, so avoiding losses caused by price volatility by holding them until maturity is not possible. Foreign securities are subject to interest rate, currency exchange rate, economic, and political risks. The fund can invest in securities that may have a leveraging effect (such as derivatives and forward-settling securities) which may increase market exposure, magnify investment risks, and cause losses to be realized more quickly.

**Short-term redemption fee:** None

**Who may want to invest:** Someone who is seeking potential returns primarily in the form of interest dividends rather than through an increase in share price; Someone who is seeking to diversify an equity portfolio with a more conservative investment option.

This description is only intended to provide a brief overview of the mutual fund. Read the fund’s prospectus for more detailed information about the fund.

The Bloomberg Barclays U.S. Aggregate Bond Index is an unmanaged market value-weighted index for U.S. dollar denominated investment-grade fixed-rate debt issues, including government, corporate, asset-backed, and mortgage-backed securities with maturities of at least one year.

Returns prior to May 4, 2011 are those of the Investor Class and reflect the Investor Class' expense ratio. Had the Premium Class' expense ratio been reflected, total returns would have been higher.

---

**Invesco Diversified Dividend Fund Class R6**

**Ticker:** LCEFX

**Gross expense ratio:** 0.44% as of 02/28/2017

**Objective:** The investment seeks long-term growth of capital and, secondarily, current income.

**Strategy:** The fund invests primarily in dividend-paying equity securities. It invests in securities that the portfolio managers believe are undervalued based on various valuation measures. The fund may invest up to 25% of its net assets in securities of foreign issuers.

**Risk:** Value stocks can perform differently than other types of stocks and can continue to be undervalued by the market for long periods of time. Stock markets are volatile and can decline significantly in response to adverse issuer, political, regulatory, market, economic or other developments. These risks may be magnified in foreign markets. Additional risk information for this product may be found in the prospectus or other product materials, if available.

**Short-term redemption fee:** None

**Who may want to invest:** Someone who is seeking the potential for long-term share-price appreciation and, secondarily, dividend income; Someone who is comfortable with the volatility of large-cap stocks and value-style investments.

This description is only intended to provide a brief overview of the mutual fund. Read the fund’s prospectus
for more detailed information about the fund.

The analysis on these pages may be based, in part, on adjusted historical returns for periods prior to the class's actual inception of 09/24/2012. These calculated returns reflect the historical performance of the oldest share class of the fund, with an inception date of 12/31/2001, adjusted to reflect the fees and expenses of this share class (when this share class's fees and expenses are higher.) Please refer to a fund's prospectus for information regarding fees and expenses. These adjusted historical returns are not actual returns. Calculation methodologies utilized by Morningstar may differ from those applied by other entities, including the fund itself.

Invesco International Growth Fund Class R6

Ticker: IGFRX
Gross expense ratio: 0.9% as of 02/28/2017
Objective: The investment seeks long-term growth of capital.

Strategy: The fund invests primarily in equity securities and depositary receipts of foreign issuers. It will provide exposure to investments that are economically tied to at least three different countries outside of the U.S. The fund may also invest up to 1.25 times the amount of the exposure to emerging markets countries in the MSCI All Country World ex-U.S. Growth Index. The fund invests primarily in the securities of large-capitalization issuers; however, the fund may invest a significant amount of its net assets in the securities of mid-capitalization issuers.

Risk: Foreign securities are subject to interest-rate, currency-exchange-rate, economic, and political risks, all of which may be magnified in emerging markets. Growth stocks can perform differently from the market as a whole and can be more volatile than other types of stocks. Stock markets are volatile and can decline significantly in response to adverse issuer, political, regulatory, market, economic or other developments. Additional risk information for this product may be found in the prospectus or other product materials, if available.

Short-term redemption fee: None

Who may want to invest: Someone who is seeking to complement a portfolio of domestic investments with international investments, which can behave differently; Someone who is willing to accept the higher degree of risk associated with investing overseas.

This description is only intended to provide a brief overview of the mutual fund. Read the fund's prospectus for more detailed information about the fund.

The MSCI ACWI ex US Growth Index is the MSCI All Country World (excluding US) Growth index. This consists of foreign stocks across 22 developed markets and 25 emerging markets, representing approximately 85% of the world’s total market capitalization outside of the U.S.

The analysis on these pages may be based, in part, on adjusted historical returns for periods prior to the class's actual inception of 09/24/2012. These calculated returns reflect the historical performance of the oldest share class of the fund, with an inception date of 04/07/1992, adjusted to reflect the fees and expenses of this share class (when this share class's fees and expenses are higher.) Please refer to a fund's prospectus for information regarding fees and expenses. These adjusted historical returns are not actual returns. Calculation methodologies utilized by Morningstar may differ from those applied by other entities, including the fund itself.
New York Life Guaranteed Interest Account

Ticker: n/a
Gross expense ratio: 0.10% as of 01/01/2016
Objective: Seeks to provide competitive yields and limited volatility with a guarantee of principal and accumulated interest. These guarantees are backed by the full faith and credit of New York Life Insurance Company.

Strategy: Contributions to the Guaranteed Interest Account are invested in a group annuity contract issued by New York Life Insurance Company. Contributions to the contract are currently invested in a broadly diversified fixed income portfolio within New York Life Insurance Company’s general account. The investments in the general account are intended to provide a stable crediting rate consistent with preservation of principal. The general account is invested primarily in a conservative array of securities and cash-equivalent investments in accordance with the investment restrictions of New York Insurance Law. The primary objective of the general account is to ensure that New York Life Insurance Company can meet its obligations to policyholders and contract holders.

Balances may be transferred into the Guaranteed Interest Account at any time.

Risk: The fund is invested in a separate account, which is a diversified portfolio of fixed-income assets. Guarantees are subject to the claims paying ability of the issuer. Restrictions or fees may apply to exchanges or withdrawals. The Contracts provide for the payment of certain withdrawals and exchanges at book value during the terms of the Contracts. In order to maintain the Contract issuers' promise to pay such withdrawals and exchanges at book value, the Contracts subject the fund and its participants to certain restrictions. For example, withdrawals prompted by certain events (e.g., layoffs, early retirement windows, spin-offs, sale of a division, facility closings, plan terminations, partial plan terminations, changes in laws or regulations) may be paid at the market value of the fund’s securities, which may be less than your book value balance or may restrict withdrawals in these events. Certain investment options offered by your plan (e.g., money market funds, short term bond funds, certain asset allocation/lifecycle funds and brokerage window) may be deemed by the Contract issuers to “compete” with this fund. The terms of the Contracts prohibit you from making a direct exchange from this fund to such competing funds. Instead, you must first exchange to a non-competing fund for 90 days. While these requirements may seem restrictive, they are imposed by the Contract issuers as a condition for the issuer's promise to pay certain withdrawals and exchanges at book value.

Short-term redemption fee: None

Who may want to invest: Someone who seeks a slightly higher yield over the long term than is offered by money market funds, but who is willing to accept slightly more investment risk; Someone who is interested in balancing an aggressive portfolio with an investment that seeks to provide a declared crediting rate that is reset on a periodic basis.

The investment option is an annuity. The fund is managed by New York Life Insurance Company. This description is only intended to provide a brief overview of the fund.

This option is not insured by the FDIC or the Federal Government.

New York Life Insurance Company provided the description for this investment option.
Northern Small Cap Value Fund

Ticker: NOSGX
Gross expense ratio: 1.24% as of 07/31/2016
Objective: The investment seeks long-term capital appreciation; any income received is incidental to this objective.

Strategy: The fund will invest at least 80% of its net assets in equity securities of small capitalization companies, which are considered to be those whose market capitalization is within the range of the market capitalization of companies in the Russell 2000 Value Index. It may emphasize particular companies or market segments, such as financial services, in attempting to achieve its investment objective. Many of the companies in which the fund invests retain their earnings to finance current and future growth. These companies generally pay little or no dividends.

Risk: The securities of smaller, less well-known companies can be more volatile than those of larger companies. Value stocks can perform differently than other types of stocks and can continue to be undervalued by the market for long periods of time. Stock markets are volatile and can decline significantly in response to adverse issuer, political, regulatory, market, economic or other developments. These risks may be magnified in foreign markets. Additional risk information for this product may be found in the prospectus or other product materials, if available.

Short-term redemption fee: None

Who may want to invest: Someone who is seeking the potential for long-term share-price appreciation and, secondarily, dividend income; Someone who is comfortable with value-style investments and the potentially greater volatility of investments in smaller companies.

This description is only intended to provide a brief overview of the mutual fund. Read the fund's prospectus for more detailed information about the fund.

The Russell 2000® Value Index is an unmanaged market capitalization-weighted index of value-oriented stocks of U.S. domiciled companies that are included in the Russell 2000 Index. Value-oriented stocks tend to have lower price-to-book ratios and lower forecasted growth values.

Prudential Total Return Bond Fund Class Q

Ticker: PTRQX
Gross expense ratio: 0.43% as of 12/28/2016
Objective: The investment seeks total return.

Strategy: The fund will seek to achieve its objective through a mix of current income and capital appreciation as determined by the fund's investment subadvisor. It invests, under normal circumstances, at least 80% of the fund's investable assets in bonds. For purposes of this policy, bonds include all fixed-income securities, other than preferred stock, with a maturity at date of issue of greater than one year. The fund may invest up to 30% of its investable assets in high risk, below investment-grade securities having a rating of not lower
than CCC. It may invest up to 30% of its investable assets in foreign debt securities.

**Risk:** In general the bond market is volatile, and fixed income securities carry interest rate risk. (As interest rates rise, bond prices usually fall, and vice versa. This effect is usually more pronounced for longer-term securities.) Fixed income securities also carry inflation risk and credit and default risks for both issuers and counterparties. Unlike individual bonds, most bond funds do not have a maturity date, so avoiding losses caused by price volatility by holding them until maturity is not possible. Additional risk information for this product may be found in the prospectus or other product materials, if available.

**Short-term redemption fee:** None

**Who may want to invest:** Someone who is seeking potential returns primarily in the form of interest dividends rather than through an increase in share price; Someone who is seeking to diversify an equity portfolio with a more conservative investment option.

This description is only intended to provide a brief overview of the mutual fund. Read the fund’s prospectus for more detailed information about the fund.

The analysis on these pages may be based, in part, on adjusted historical returns for periods prior to the class’s actual inception of 12/27/2010. These calculated returns reflect the historical performance of the oldest share class of the fund, with an inception date of 01/10/1995, adjusted to reflect the fees and expenses of this share class (when this share class's fees and expenses are higher.) Please refer to a fund's prospectus for information regarding fees and expenses. These adjusted historical returns are not actual returns. Calculation methodologies utilized by Morningstar may differ from those applied by other entities, including the fund itself.

---

**T. Rowe Price Blue Chip Growth Fund I Class**

**Ticker:** TBCIX

**Gross expense ratio:** 0.63% as of 05/01/2016

**Objective:** The investment seeks long-term capital growth; income is a secondary objective.

**Strategy:** The fund will normally invest at least 80% of its net assets (including any borrowings for investment purposes) in the common stocks of large- and medium-sized blue chip growth companies. It focuses on companies with leading market positions, seasoned management, and strong financial fundamentals. The fund may sell securities for a variety of reasons, such as to secure gains, limit losses, or redeploy assets into more promising opportunities.

**Risk:** Growth stocks can perform differently from the market as a whole and can be more volatile than other types of stocks. Stock markets are volatile and can decline significantly in response to adverse issuer, political, regulatory, market, economic or other developments. These risks may be magnified in foreign markets. Additional risk information for this product may be found in the prospectus or other product materials, if available.

**Short-term redemption fee:** None

**Who may want to invest:** Someone who is seeking the potential for long-term share-price appreciation; Someone who is willing to accept the generally greater price volatility associated with growth-oriented stocks.
Vanguard FTSE Social Index Fund Investor Shares

Ticker: VFTSX

Gross expense ratio: 0.22% as of 12/22/2016

Objective: The investment seeks to track the performance of a benchmark index that measures the investment return of large- and mid-capitalization stocks.

Strategy: The fund employs an indexing investment approach designed to track the performance of the FTSE4Good US Select Index. The index is composed of the stocks of companies that have been screened for certain social and environmental criteria by the index sponsor, which is independent of Vanguard. The Advisor attempts to replicate the index by investing all, or substantially all, of its assets in the stocks that make up the index.

Risk: Value and growth stocks can perform differently from other types of stocks. Growth stocks can be more volatile. Value stocks can continue to be undervalued by the market for long periods of time. Stock markets are volatile and can decline significantly in response to adverse issuer, political, regulatory, market, economic or other developments. These risks may be magnified in foreign markets. Additional risk information for this product may be found in the prospectus or other product materials, if available.

Short-term redemption fee: None

Who may want to invest: Someone who is seeking the potential for long-term share-price appreciation and, secondarily, dividend income; Someone who is seeking both growth- and value-style investments and who is willing to accept the volatility associated with investing in the stock market.

This description is only intended to provide a brief overview of the mutual fund. Read the fund's prospectus for more detailed information about the fund.

Additional Risk Information: The Fund’s social responsibility criteria will affect the fund’s exposure to certain issuers, industries, sectors, regions and countries and could cause the fund to sell or avoid stocks that subsequently perform well. In addition, undervalued stocks that do not meet the social criteria could outperform those that do.

The FTSE4Good U.S. Select Index is composed of the stocks of companies that have been screened for certain social and environmental criteria by the index sponsor, which is independent of Vanguard.

Vanguard Intermediate-Term Government Bond Index Fund Admiral Shares
Ticker: VSIGX
**Gross expense ratio:** 0.07% as of 12/22/2016

**Objective:** The investment seeks to track the performance of a market-weighted government bond index with an intermediate-term dollar-weighted average maturity.

**Strategy:** The fund employs an indexing investment approach designed to track the performance of the Bloomberg Barclays U.S. 3-10 Year Government Float Adjusted Index. This index includes fixed income securities issued by the U.S. Treasury and U.S. government agencies and instrumentalities, as well as corporate or dollar-denominated foreign debt guaranteed by the U.S. government, with maturities between 3 and 10 years. At least 80% of the fund's assets will be invested in bonds included in the index.

**Risk:** In general the bond market is volatile, and fixed income securities carry interest rate risk. (As interest rates rise, bond prices usually fall, and vice versa. This effect is usually more pronounced for longer-term securities.) Fixed income securities also carry inflation risk and credit and default risks for both issuers and counterparties. Unlike individual bonds, most bond funds do not have a maturity date, so avoiding losses caused by price volatility by holding them until maturity is not possible. Additional risk information for this product may be found in the prospectus or other product materials, if available.

**Short-term redemption fee:** None

**Who may want to invest:** Someone who is seeking a fund that invests primarily in securities issued by the U.S. government and its agencies or instrumentalities; Someone who is seeking to diversify an equity portfolio with a more conservative investment option.

This description is only intended to provide a brief overview of the mutual fund. Read the fund's prospectus for more detailed information about the fund.

The Bloomberg Barclays U.S. 3-10 Year Government Float Adjusted Index includes fixed income securities issued by the U.S. Treasury (not including inflation-protected bonds) and U.S. government agencies and instrumentalities, as well as corporate or dollar-denominated foreign debt guaranteed by the U.S. government, with maturities between 3 and 10 years.

Weighted average maturity (WAM) is the weighted average of all the maturities of the securities held in a fund. WAM for money market funds can be used as a measure of sensitivity to interest rate changes. Generally, the longer the maturity, the greater the sensitivity. WAM for money market funds is based on the dollar-weighted average length of time until principal payments must be paid, taking into account any call options exercised by the issuer and any permissible maturity shortening devices, such as demand features and interest rate resets. For bond funds, WAM can be used as a measure of sensitivity to the markets. Generally, the longer the maturity, the greater the sensitivity. The WAM calculation for bond funds excludes interest rate resets and only takes into account issuer call options if it is probable that the issuer of the instrument will take advantage of such options.

---

**Vanguard REIT Index Fund Admiral Shares**

Ticker: VGSLX

**Gross expense ratio:** 0.12% as of 05/25/2016

**Objective:** The investment seeks to provide a high level of income and moderate long-term capital appreciation by tracking the performance of a benchmark index that measures the performance of publicly traded equity REITs.
**Strategy:** The fund employs an indexing investment approach designed to track the performance of the MSCI US REIT Index. The index is composed of stocks of publicly traded equity real estate investment trusts (known as REITs). The adviser attempts to replicate the index by investing all, or substantially all, of its assets in the stocks that make up the index, holding each stock in approximately the same proportion as its weighting in the index.

**Risk:** Real Estate is a cyclical industry that is sensitive to interest rates, economic conditions (both nationally and locally), property tax rates, and other factors. Changes in real estate values or economic downturns can have a significant negative effect on issuers in the real estate industry. Stock markets are volatile and can decline significantly in response to adverse issuer, political, regulatory, market, economic or other developments. These risks may be magnified in foreign markets. Sector funds can be more volatile because of their narrow concentration in a specific industry. In general the bond market is volatile, and fixed income securities carry interest rate risk. (As interest rates rise, bond prices usually fall, and vice versa. This effect is usually more pronounced for longer-term securities.) Fixed income securities also carry inflation risk and credit and default risks for both issuers and counterparties. Unlike individual bonds, most bond funds do not have a maturity date, so avoiding losses caused by price volatility by holding them until maturity is not possible. Additional risk information for this product may be found in the prospectus or other product materials, if available.

**Short-term redemption fee:** None

**Who may want to invest:** Someone who is willing to accept the potentially lower diversification and higher risks associated with investing in a particular industry or sector; Someone who is seeking to complement his or her core holdings with investments concentrated in a particular sector or industry.

This description is only intended to provide a brief overview of the mutual fund. Read the fund’s prospectus for more detailed information about the fund.

The MSCI US REIT Index is a free float-adjusted market capitalization weighted index that is comprised of equity REITs that are included in the MSCI US Investable Market 2500 Index, with the exception of specialty equity REITs that do not generate a majority of their revenue and income from real estate rental and leasing operations. The index represents approximately 85% of the US REIT universe.

The analysis on these pages may be based, in part, on adjusted historical returns for periods prior to the class's actual inception of 11/12/2001. These calculated returns reflect the historical performance of the oldest share class of the fund, with an inception date of 05/13/1996, adjusted to reflect the fees and expenses of this share class (when this share class's fees and expenses are higher.) Please refer to a fund's prospectus for information regarding fees and expenses. These adjusted historical returns are not actual returns. Calculation methodologies utilized by Morningstar may differ from those applied by other entities, including the fund itself.

**Vanguard Target Retirement 2015 Fund Investor Shares**

**Ticker:** VTXVX

**Gross expense ratio:** 0.14% as of 01/27/2017

**Objective:** The investment seeks to provide capital appreciation and current income consistent with its current asset allocation.

**Strategy:** The fund invests in other Vanguard mutual funds according to an asset allocation strategy designed
for investors planning to retire and leave the workforce in or within a few years of 2015 (the target year). The fund's asset allocation will become more conservative over time, meaning that the percentage of assets allocated to stocks will decrease while the percentage of assets allocated to bonds and other fixed income investments will increase.

**Risk:** The target date funds are designed for investors expecting to retire around the year indicated in each fund's name. The funds are managed to gradually become more conservative over time as they approach their target date. The investment risk of each target date fund changes over time as its asset allocation changes. They are subject to the volatility of the financial markets, including that of equity and fixed income investments in the U.S. and abroad, and may be subject to risks associated with investing in high-yield, small-cap, and foreign securities. Principal invested is not guaranteed at any time, including at or after their target dates. Additional risk information for this product may be found in the prospectus or other product materials, if available.

**Short-term redemption fee:** None

**Who may want to invest:** Someone who is seeking an investment option intended for people in or very near retirement and who is willing to accept the volatility of diversified investments in the market; Someone who is seeking a diversified mix of stocks, bonds, and short-term investments in one investment option or who does not feel comfortable making asset allocation choices over time.

This description is only intended to provide a brief overview of the mutual fund. Read the fund's prospectus for more detailed information about the fund.

---

**Vanguard Target Retirement 2020 Fund Investor Shares**

**Ticker:** VTWNX

**Gross expense ratio:** 0.14% as of 01/27/2017

**Objective:** The investment seeks to provide capital appreciation and current income consistent with its current asset allocation.

**Strategy:** The fund invests in other Vanguard mutual funds according to an asset allocation strategy designed for investors planning to retire and leave the workforce in or within a few years of 2020 (the target year). The fund's asset allocation will become more conservative over time, meaning that the percentage of assets allocated to stocks will decrease while the percentage of assets allocated to bonds and other fixed income investments will increase.

**Risk:** The target date funds are designed for investors expecting to retire around the year indicated in each fund's name. cap, and foreign securities. Principal invested is not guaranteed at any time, including at or after their target
dates. Additional risk information for this product may be found in the prospectus or other product materials,
if available.

**Short-term redemption fee:** None

**Who may want to invest:** Someone who is seeking an investment option that gradually becomes more
conservative over time and who is willing to accept the volatility of the markets; Someone who is seeking a
diversified mix of stocks, bonds, and short-term investments in one investment option or who does not feel
comfortable making asset allocation choices over time.

This description is only intended to provide a brief overview of the mutual fund. Read the fund's prospectus
for more detailed information about the fund.

---

**Vanguard Target Retirement Income Fund Investor Shares**

**Ticker:** VTIX

**Gross expense ratio:** 0.13% as of 01/27/2017

**Objective:** The investment seeks to provide current income and some capital appreciation.

**Strategy:** The fund invests in other Vanguard mutual funds according to an asset allocation strategy designed
for investors currently in retirement. Its indirect bond holdings are a diversified mix of short-, intermediate-, and
long-term U.S. government, U.S. agency, and investment-grade U.S. corporate bonds; inflation-protected public obligations issued by the U.S. Treasury; mortgage-backed and asset-backed securities; and
government, agency, corporate, and securitized investment-grade foreign bonds issued in currencies other
than the U.S. dollar.

**Risk:** The fund is subject to the volatility of the financial markets, including that of equity and fixed income
investments. Fixed income investments carry issuer default and credit risk, inflation risk, and interest rate risk. (As interest rates rise, bond prices usually fall, and vice versa. This effect is usually more pronounced for longer-term securities.) Principal invested is not guaranteed at any time, including at or after retirement.

Additional risk information for this product may be found in the prospectus or other product materials, if available.

**Short-term redemption fee:** None

**Who may want to invest:** Someone who is seeking an investment option intended for people in retirement
and who is willing to accept the volatility of diversified investments in the market; Someone who is seeking a
diversified mix of stocks, bonds, and short-term investments in one investment option and looking primarily
for the potential for income and, secondarily, for share-price appreciation.

This description is only intended to provide a brief overview of the mutual fund. Read the fund's prospectus
for more detailed information about the fund.

---

**Wells Fargo Small Company Growth Fund - Class R6**

**Ticker:** WSCRX

**Gross expense ratio:** 0.91% as of 10/01/2016

**Objective:** The investment seeks long-term capital appreciation.
**Strategy:** The fund invests at least 80% of its net assets in equity securities of small-capitalization companies. It is a gateway fund that invests substantially all of its assets in the Small Company Growth Portfolio, a master portfolio with a substantially identical investment objective and substantially similar investment strategies. The fund invests principally in equity securities of small-capitalization companies, which the managers define as companies with market capitalizations within the range of the Russell 2000® Index at the time of purchase.

**Risk:** The securities of smaller, less well-known companies can be more volatile than those of larger companies. Growth stocks can perform differently from the market as a whole and can be more volatile than other types of stocks. Stock markets are volatile and can decline significantly in response to adverse issuer, political, regulatory, market, economic or other developments. These risks may be magnified in foreign markets. Additional risk information for this product may be found in the prospectus or other product materials, if available.

**Short-term redemption fee:** None

**Who may want to invest:** Someone who is seeking the potential for long-term share-price appreciation; Someone who is willing to accept the generally greater price volatility associated both with growth-oriented stocks and with smaller companies.

This description is only intended to provide a brief overview of the mutual fund. Read the fund's prospectus for more detailed information about the fund.

The Russell 2000® Index is an unmanaged market capitalization-weighted index of 2,000 small company stocks of U.S. domiciled companies.

The analysis on these pages may be based, in part, on adjusted historical returns for periods prior to the class's actual inception of 10/31/2014. These calculated returns reflect the historical performance of the oldest share class of the fund, with an inception date of 11/11/1994, adjusted to reflect the fees and expenses of this share class (when this share class's fees and expenses are higher.) Please refer to a fund's prospectus for information regarding fees and expenses. These adjusted historical returns are not actual returns. Calculation methodologies utilized by Morningstar may differ from those applied by other entities, including the fund itself.

**Fidelity BrokerageLink®**

**FPRS Code:** BLNK

**Objective:** To provide a broad range of mutual funds that allow you expanded choices in managing your retirement savings more actively.

**Strategy:** BrokerageLink is a brokerage account within your retirement plan. You alone decide how to invest the assets in your Fidelity BrokerageLink account. You can invest in a vast array of mutual funds from either Fidelity, or from Fidelity and other mutual fund companies through BrokerageLink. Brokerage services are provided through Fidelity Brokerage Services LLC, a member of the New York Stock Exchange and Securities Investor Protection Corporation.

**Risk:** Brokerage Link includes investments beyond those in your plan’s lineup. The plan fiduciary neither evaluates nor monitors the investments available through BrokerageLink. It is your responsibility to ensure the investments you select are suitable for your situation, including your goals, time horizon, and risk tolerance. See the fact sheet and commission schedule for applicable fees and risks. This account is neither a mutual fund nor is it managed by any of the Fidelity Investments group of companies.
Short-term redemption fee: None

Who may want to invest: Someone who is comfortable with evaluating and researching a broad universe of mutual funds, and who wants to invest part of his or her retirement savings in mutual funds through a brokerage account.

Someone who wants the highest degree of variety in selecting mutual fund investments for his or her retirement savings, and who is familiar with how a brokerage account operates.

If you have any questions about a Fidelity BrokerageLink account, please call 800-343-0860.
Expense Ratio Footnotes
For a mutual fund, the expense ratio is the total annual fund or class operating expenses (before waivers or reimbursements) paid by the fund and stated as a percent of the fund's total net assets. Where the investment option is not a mutual fund, the figure displayed in the expense ratio field is intended to reflect similar information. However, it may have been calculated using methodologies that differ from those used for mutual funds. Mutual fund data has been drawn from the most recent prospectus. For non-mutual fund investment options, the information has been provided by the trustee or plan sponsor. When no ratio is shown for these options it is due to the fact that none was available. Nevertheless, there may be fees and expenses associated with the investment option.

A mutual fund expense ratio is the total annual fund or class operating expenses (before waivers or reimbursements) paid by the fund and stated as a percentage of the fund's total net assets. For other types of investments, the figure in the expense ratio field reflects similar information, but may have been calculated differently than for mutual funds. Mutual fund data comes from the fund's prospectus. For non–mutual fund investment options, the information has been provided by the plan sponsor, the investment option's manager, or the trustee. When no ratio is shown for these options, it is because none was available. There may be fees and expenses associated with the investment option. Expense information changes periodically. Please consult NetBenefits for updates.

One-Way Equity Wash:
You are not permitted to make a direct exchange from the New York Life Guaranteed Interest Account to the Brokerage (BLNK) account (considered “competing funds”). Before exchanging from New York Life Guaranteed Interest Account you must first exchange to a “noncompeting” fund for 90 days. While these requirements may seem restrictive, they are typically imposed by issuers such as insurance companies, banks, or other approved financial institutions, as a condition for issuing investment contracts to retirement plans.

Before investing, consider the funds' investment objectives, risks, charges, and expenses. Contact Fidelity for a prospectus or, if available, a summary prospectus containing this information. Read it carefully.
